

Custom Fabric Development

Custom Fabric Development

In a world of individual tastes, Taffard specializes in custom tailored solutions for our discerning clients. We understand that today's designers want to offer their clients something different, something unique, something that stands out and something exclusive that only they would have. We have made fabrics ranging from hand embroidered silk velvet panels and hand painted pillows to custom table linens for banquet halls to custom stripes for private residences. We've done everything from producing custom fabrics that were inspired by magazine clippings and hand drawn sketches to reproducing fabrics for clients who wanted to have the same drapes as their great-grandparents had. We have the talent, experience and knowledge to take a designer's vision and make it a reality. We make digital images, strikes offs and work hand in hand with our clients to ensure our clients vision is accurately realized. Our talented textile designers collaborate hand in hand with our production department to not only bring the artistic vision to surface, but also the realities of the business aspect and technical applications as well. Taffard takes pride in taking into account the smallest of details and meeting price targets for our clientele.
